# GREENER project sharing innovative energy solutions!

## Increasing public awareness of energy efficiency, renewable and smart energy management solutions

Welcome to the 2nd **GREENER project** newsletter. Sustainable energy provision has become a fundamental priority in the agenda of NPA regions. The impact that climate change has on the reliability and performance of energy systems, joined with factors like peripherality, low population density, sparse settlements, migration, extreme climates, distances, accessibility, over reliance on fossil fuels, , and now concerns over fuel supplies, have resulted in increasingly higher energy costs for domestic, business, and public consumers with a consequential adverse impact on economic competitiveness.

The **GREENER project** addresses these challenges by clustering 3 NPA projects' (**SMARCTIC**, **LECO** and **h-CHP**), using their collective capacity and complementarity to increase awareness, and transfer knowledge about the latest energy efficiency and renewable solutions to public authorities, communities, and businesses across the NPA regions.

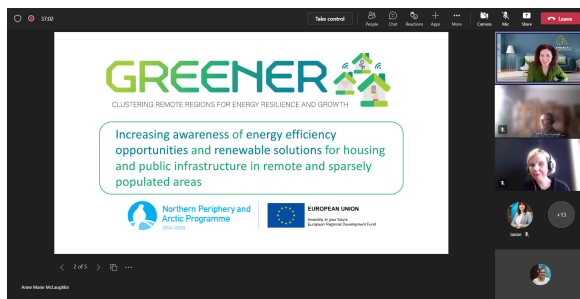

## GREENER closing conference on Energy Innovation for Remote Areas

On June 16, GREENER project hosted online the closing conference of the partnership on "Energy Innovation for Remote Areas". People across Europe joined the event to learn more about biogas production and renewable energy solutions for rural entrepreneurs.

**GREENER Seminar: Energy Innovation**

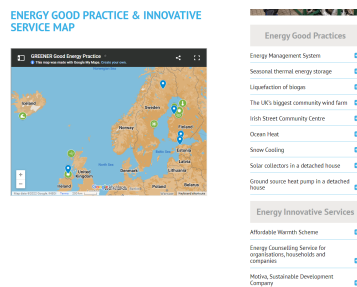

## for Remote Housing and Public Infrastructure

GREENER's recent 3rd seminar brought together energy experts, academics, SME's and the general public to share learnings and increase awareness about the latest energy solutions across the NPA area. If you missed the seminar, you can watch here!

## GREENER at the NPA in-person! event

Our project lead partner representative, Anne Marie McLaughlin participated in a panel discussing the benefits of cluster projects and presenting the achievements of the GREENER project over the past months. The event celebrated the achievements of the NPA 2014-2020 and introduced the new NPA 2021-2027 programme.

## GREENER blog on Energy Services, much more than just Energy

GREENER project partners from University of Oulu & Centria University of Applied Sciences created a blog about the energy services shared during the GREENER second seminar. Read our blog here!
